Quick Setup

Power on the Breezy Smart controller

Power on the controller pressing and holding the power key for about 5 seconds until the controller screen turns on.

Setup Wifi – optional if SIM card is installed

- Select settings from the : icon on the main screen.
- Enter 1234, then press OK.
- Ensure "Use Wi-Fi" is ON and Select the desired Wi-Fi network.
- Enter Wi-Fi password if needed and press CONNECT.

Sign up or sign into user account

- The Breezy Smart Controller app will automatically launch
- Press Sign Up or sign into an existing account. If Sign Up is selected, an email and a password will

be required. One-time email verification will be required for the first sign in.

 If a new account is created, press the Create Site button and enter a site name. The site name is normally the company or building name where Breezy will be used.

 Select the site the controller should be associated with from the drop-down list. Some users may have multiple sites to choose from.

Add Controller to site

• Allow the controller to be added to the site by establishing trust. Enter the serial number from the rear of the controller (including all zeros), and optionally name the controller (user's name, floor in building, etc.) then press continue.

Connect to Breezy Blue Device
